

**Expression Connection****Assistive Technology and Augmentative Alternative Communication Services**

The popular DSCBA Expression Connection educational program is in its 9<sup>th</sup> year providing communication systems, strategies, education, and techniques to individuals who have Down syndrome or co-existing Down syndrome and Autism, as well as their caretakers and education professionals.

Many people of all ages who are non-verbal or have limited language have benefitted greatly from Expression Connection services which provides alternative means to express basic needs, make choices, interact while learning and much more. Assistive Technology (AT) can also successfully provide independent ways to access classroom curriculum such as reading, writing, and math.

We are proud to have a menu of services to choose from through DSCBA Partner/Consultants and SLP/AAC Specialists Reeni Kraft (serving the East Bay and SF) and Celia Hughell (serving the North Bay).

**AT-AAC Services**

- 1. Referral:** A free 30-minute phone consultation regarding the needs and questions of the client.
- 2. AAC/AT Introduction:** A meeting of up to two hours with team members to explore equipment at the DSCBA's Lending Library that supports communication, reading, writing, and math.
- 3. Implementation Consult:** A consultation for individuals and teams who have systems and tools but want support integrating them into the individual's day to day routine, whether that is in school, home, work, or other.
- 4. Action Plan:** Develop a plan to implement recommended tools and strategies.
- 5. Coaching:** Learn about evidence-based partner strategies, teaching tools, and methods that facilitate use of AAC and AT tools.
- 6. Tech Support:** Learn how to use, program, and feel comfortable with AAC and AT technology.
  - \* Services are provided in person at the DSCBA offices in Danville and Santa Rosa or virtually via Zoom. In extenuating circumstances, services may be provided in the home, school, and/or community settings if deemed necessary.

\* Limited scholarships provided by DSCBA are available with application submittal and approval.

For more information about this program please contact Reeni Kraft ([reeni@withoutlimitstherapy.com](mailto:reeni@withoutlimitstherapy.com)) or Celia Hughell ([chughell@gmail.com](mailto:chughell@gmail.com)).

**DEVICE**

**WEBSITE**

**Step-by-Step with Levels**

[www.ablenetinc.com](http://www.ablenetinc.com)

Designed for pre-recording a series of message sequences to be used throughout the individuals day, or program messages to correspond to the activities planned in the home, community, and/or classroom.

**Go Talk One**

[www.attainmentcompany.com](http://www.attainmentcompany.com)

Single message recordable device. These devices can be mounted to a location or carried around for mobile communication.

**Talking Block**

[www.ablenetinc.com](http://www.ablenetinc.com)

Talking-Block is a single-message communication device. The large size is suitable for people with visual or motor skill impairments. It can be used in a range of communication, speaking, and listening activities.

**Go Talk 4, 9, 20**

[www.attainmentcompany.com](http://www.attainmentcompany.com)

Lightweight and rugged; message capacity at five recording levels; three "core messages" which stay the same on each level; 4, 9, 20 locations.

**Talking Photo Album**

[www.attainmentcompany.com](http://www.attainmentcompany.com)

Speech output album that holds standard 43 x 63 photos. The Talking Photo Album includes a total of 24 pages, each with an individual message capacity of 10 seconds. Insert photos or picture/text cards into the transparent sleeves and record corresponding messages. User squeezes Play button to activate speech.

**iPad**

[www.apple.com](http://www.apple.com)

9.5" (l) x 7.31" (w) screen with communication and educational apps ranging in complexity. *Please see applications list, next page.*

**APPLICATION**

**COMPATIBILITY**

**SCREEN SHOT**

**AAC Genie**

iPad

Requires iOS 10.2 or later

AAC Evaluation Genie is an informal diagnostic tool that is intended to assist speech-language pathologists and others with identifying skill areas that relate specifically to the language representation methods commonly found on augmentative communication systems. The purpose of AAC Evaluation Genie is not to identify a particular speech generating device, but rather build a framework for selecting an appropriate augmentative communication device for ongoing evaluation and / or device trial.

**GoTalk Now Plus9**

iPad

Requires iOS 8.1 or later

GoTalk NOW has all the essentials of an effective AAC app, like adjustable page layouts, customizable navigation, recorded and text-to-speech capabilities, and an included symbol set. But we sweated the details to create unique and compelling features that clearly separate NOW from other AAC apps.

**LAMP**

iPad

Requires iOS 8.1 or later

LAMP Words For Life™ is a full English vocabulary augmentative and alternative communication (AAC) language app that combines the power of the PRC Unity® language system with Language Acquisition through Motor Planning (LAMP™) principles and strategies. LAMP Words For Life™ app is symbol based for those who are not yet literate; however, those symbols are paired with text to support literacy development. The vocabulary, structure, and teaching approach are based on research and years of implementation with individuals with autism and other developmental disabilities.

**Pictello**

iPhone, iPad, and iPod touch

Requires iOS 9.3 or later

Everyone loves to tell fun, engaging, and imaginative stories. Go ahead and make a social story or visual schedule for a child with autism or a slide show of holiday pictures for your friends - Pictello makes it a breeze to create and share! Whether you use the included natural-sounding Text to Speech voices, or record your own voice, Pictello is the perfect tool for visual storytelling.

**ProLoQuo2Go**

iPhone, iPad, and iPod touch

Requires iOS 10.3 or later

Proloquo2Go is an award-winning symbol-based communication app that gives a voice to those who cannot speak. Over 175,000 people already use this AAC app as a powerful tool for expressing themselves and increasing their communication skills and language development. Its innovative features let users, parents, teachers and therapists quickly personalize the app.

**TouchChat HD with Word Power**

iPhone, iPad, and iPod touch

Requires iOS 8.1 or later

TouchChat HD is a full-featured communication solution for individuals who have difficulty using their natural voice. TouchChat is designed for individuals with Autism, Down Syndrome, ALS, apraxia, stroke, or other conditions that affect a person's ability to use natural speech.
